

8-Port Optical Core Switch

Overview

D5130-W08-S is an all-optical 8× 8 matrix switch designed for high-throughput, low-latency interconnection between multiple input and output fibers. Equipped with eight SFP+ ports, two additional SFP28 ports and one RJ45 console port for configuration. It enables any-to-any connectivity between input and output ports via a transparent optical switch core—transmitting the original light signal without. An 8-port transparent distribution device on the building side supports both 10 Gbps and 1 Gbps per port, and can accommodate up to 48 ports when fully loaded. The device integrates WDM technology, which allows for a network architecture reduced from three layers to two layers. With WDM, services. □10Gb Super-Fast Fiber Switch□This 10 gigabit switch features 8 x 10G SFP+ ports and 160Gbps switching capacity, providing higher-speed connectivity for your devices and allowing you to easily upgrade your network to support the latest 10Gb standard. A standard product features gigabit uplink speed, easy installation, high security, flexibility of selecting SFP modules, which gives ease of management. An 8-port, Layer 2 switch made for 10G SFP+ connections. Faster replacement and priority support, covered for 5 years. High-performance 10G SFP modules for optimal connectivity.
