

8-Port Switch for Industrial Use

Overview

An 8-port industrial Ethernet switch is a ruggedized network device designed to ensure reliable connectivity in extreme conditions like factories, outdoor sites, and industrial automation. Both the 8-Port Industrial Switch (852-1102) and the 8-Port Industrial ECO Switch (852-1112) meet these requirements. The features provided by the 852-1102 Switch speak for themselves: a high data throughput of 1 Gbit as well as suitability for use in extreme ambient conditions ensure a large. The EDS-208A Series 8-port industrial Ethernet switches support IEEE 802.3u/x with 10/100M full/half-duplex, MDI/MDI-X auto-sensing. The EDS-208A Series has 12/24/48 VDC (9.6 to 60 VDC) redundant power inputs that can be connected simultaneously to live DC power sources. A high speed switch core ensures full speed on all ports and transparency to any Ethernet protocol. These switches combine durability.
