

Access Huawei core switches

Overview

Access the switch console or CLI: Connect to the switch console using a terminal emulator or access the switch CLI remotely through SSH or Telnet. Enter privilege mode: If you're not already in privilege mode, enter the privilege mode by typing enable and providing. Huawei campus switches are ideal for building future-proof campus networks with simplified management, high reliability, and service intelligence, across industries such as enterprises, governments, education, finance, and manufacturing. "Campus Networks Typical Configuration Examples" provides typical campus network networking modes and a variety of deployment examples. For more service configurations, see the Switch Configuration Guide. This document is for switches running V200R003C00 and later. You can run the display version command in the user view to check. Enabling Telnet Service and Granting Access on a Huawei Switch Enabling Telnet Service and User Authorization Connecting via CLI: Connect to the Huawei switch via SSH or the console port. Logging into the Management Interface: Log in to the management interface using your username and password. In order to ensure efficient operation and stability of the network, network administrators need to regularly monitor. This article describes the basic configuration required to enable access to the S5700 switch via the WebUI interface.
