

Anning Trough-type Fireproof Cable Tray

Overview

Introducing our Trough Type Fireproof Cable Tray, engineered specifically for fire safety in critical applications. Its unique design, featuring a solid bottom and side rails, makes it ideal for a wide range of applications, from industrial plants to. Strong Anti-Interference Capability: The enclosed structure shields against electromagnetic interference (EMI), making it suitable for low-voltage signal cables. The market is evolving rapidly, driven by new construction, data center growth, and stringent safety standards. The global cable tray and trunking market is experiencing. Fireproof trough type cable tray is a fully enclosed cable management system designed to provide superior protection for electrical cables in demanding industrial, commercial, and infrastructure environments. Constructed from high-quality steel with a special fire-retardant coating, it effectively prevents flame spread and protects cables in emergency situations.
