

## Bahamas Bridge Construction

### AI Overview

The Bahamas is actively investing in bridge construction and rehabilitation, with major projects including the Glass Window Bridge, Little Abaco Bridge, and a National Bridge Programme across multiple islands.

**Key Projects and Developments**

**Glass Window Bridge, Eleuthera** The Glass Window Bridge is undergoing reconstruction due to structural shifts and safety concerns. Estimated costs range from \$40 to \$50 million, with some estimates reaching \$100 million for a fully new bridge. The project is being managed under the Bridge Authority Amendment Bill, which allows for public-private partnerships and creative loan financing, bypassing central government constraints. Completion is expected by 2027, and the bridge is considered hazardous during rough weather due to strong ocean currents.

**Little Abaco Bridge, North Abaco** This project involves the construction of a 266-foot freestanding steel girder bridge with a 12-foot clearance at high water. The bridge includes reinforced concrete abutments and surrounding roadway elevation adjustments to accommodate the new structure. This ensures improved connectivity and safety for the local community.

**National Bridge Programme** The Bahamian government has launched a National Bridge Programme to construct and rehabilitate key bridges in Exuma, Andros, and New Providence, aiming to enhance connectivity and safety across the Family Islands. This initiative is part of a broader infrastructure strategy to modernize transportation networks and support economic development.

**Oversight and Technical Support** The Department of Public Works under the Ministry of Works and Family Island Affairs oversees bridge construction and maintenance. Key technical sections include Civil Design Roads, responsible for airports, roads, bridges, and stormwater drains, and Structural Engineering, which provides structural investigations and ensures compliance with building regulations.

**Financing and Management** The Bahamas is increasingly using public-private partnerships and loan financing to fund...
