

Complete List of Primary Distribution Box Specifications and Models

AI Overview

Primary distribution boxes (DB boxes) come in various types and models, including low-voltage fixed and withdrawable switchgear, surface, flush, and pole-mounted enclosures, each designed for specific residential, commercial, or industrial applications.

Overview of Distribution Boxes A distribution box (DB box) is a central hub that safely distributes electrical power from a main supply to multiple circuits. It houses protective devices such as circuit breakers, fuses, residual current circuit breakers (RCCBs), isolators, and bus bars, ensuring safe and efficient power management in homes, offices, factories, and industrial plants. Modern DB boxes may also include energy monitoring units and communication modules for smart control.

Common Types and Mounting Styles

- Surface Mounted DB Boxes:** Installed directly on walls, suitable for retrofits and industrial environments.
- Flush Mounted DB Boxes:** Embedded into walls for a clean appearance, commonly used in residential and commercial buildings.
- Pole Mounted DB Boxes:** Designed for outdoor applications such as street lighting and utility distribution.
- Single Phase DB Boxes:** Ideal for residential properties and small commercial loads.
- Three Phase DB Boxes:** Used in industrial and large commercial facilities requiring higher power capacity.
- Lighting Distribution Boxes:** Dedicated to lighting circuits.
- Power Distribution Boxes:** Support sockets, equipment, and heavy machinery.
- Control Distribution Boxes:** Integrate control components like relays, contactors, and timers.

Primary Models and Specifications

- Low-Voltage Fixed Switchgear GGD Series:** High breaking capacity, stable performance, AC 50Hz, rated voltage 380V, used in substations and power plants.
- GDH Series:** Similar to GGD, with manufacturer-specific parameters.
- PGL Series:** Widely used in locations requiring stable power supply.
- Low-Voltage Withdra...**
