

# **Delivery time for 2-core fiber optic quick connector**

## **AI Overview**

Standard 2-core fiber optic quick connectors typically ship in about 7 days, while custom orders take 15–30 days. Fiber optic quick connectors, also known as field-assembly or fast connectors, are designed for rapid installation without polishing or epoxy, making them ideal for FTTH, LAN, and data center applications. Standard connectors are pre-manufactured and ready to ship, which allows suppliers to deliver them within approximately 7 days. If your order requires customization—such as specific fiber types (single-mode OS2 or multimode OM3/OM4), connector types (LC, SC, MPO), patch cord lengths, or special jackets—delivery can extend to 15–30 days. These connectors are engineered for quick termination, often completing installation in under 30 seconds, and are compatible with 250  $\mu\text{m}$  to 900  $\mu\text{m}$  fibers. The fast delivery of standard connectors supports rapid deployment in projects requiring minimal downtime, while custom orders allow for tailored solutions to meet specific network requirements. For planning purposes, if you need the connectors urgently, ordering standard pre-configured models ensures the fastest turnaround, whereas customized configurations should be factored into your project timeline to accommodate the longer lead time.
