

Dominican Republic Cable Tray Construction Project

Overview

The project, presented alongside President Luis Abinader at the National Palace, will triple the number of direct cables to the US and increase the number of fiber pairs tenfold, reducing latency and improving the resilience of digital communications. The Dominican Republic's electronics manufacturing ecosystem supports cable management system producers supplying data centers, telecom infrastructure, and commercial construction. Surging. Caribbean Transmission Development Co., LLC (the Applicant or CTDC) has filed an application requesting a new Presidential permit to allow for the construction, connection, operation, and maintenance of facilities for transmission of electric energy at the international border between the United. In 2018, with the construction of the first urban cable car in the Caribbean, the story of Poma RD begins in the Dominican Republic. Over 5 km long, with its 36 towers and 195 cabins, the Santo Domingo cable car will quickly meet the needs of a local population suffering from saturated road traffic. The city of Santo Domingo inaugurates its new urban aerial tramway line, the fastest in the world. The monocable system criss-crosses the sky over a 4.
