

# Dutch Price for Telecom-Grade Routers QSFP

## AI Overview

Telecom-grade QSFP28 modules in the Netherlands range from approximately €35 for short-reach third-party modules to several thousand euros for OEM long-reach modules.

**QSFP28 Module Pricing**

**Short-Reach (SR4) Modules:** Third-party compatible modules can cost as low as €35–€50, delivering 100G connectivity at roughly €0.35 per Gbps, making them highly cost-efficient for high-bandwidth deployments.

**Long-Reach (LR4/ER4/ZR4) Modules:** OEM-branded modules for distances up to 40 km or more can reach €1,000–€3,000 per module, depending on vendor, warranty, and platform compatibility.

**Mid-Range Modules (CWDM4, LR4, FR1, LR1):** These widely available optics are competitively priced, often €200–€600, offering a balance between performance and cost.

**Dutch Suppliers**

**Routershop.nl:** A local Dutch specialist in routers and switches, offering telecom-grade networking equipment and support for enterprise deployments.

**Alibaba Netherlands (YtoptoTechnologie):** Offers telecom and ISP-grade QSFP28 ER4 modules with 40 km SMF support, suitable for high-reliability optical networks.

**Considerations for Procurement**

**OEM vs Third-Party:** OEM modules are more expensive due to branding, warranty, and platform-specific testing, while third-party modules often meet the same MSA/IEEE specifications at a fraction of the cost.

**Cost per Gbps:** Evaluating cost per gigabit is crucial; a €35 SR4 module provides much lower bandwidth cost than a €20 SFP+ 10G module, despite higher upfront cost.

**Volume Discounts:** Large-scale purchases can reduce per-unit costs, especially for third-party modules.

**Compatibility:** Ensure modules are compatible with your existing router or switch platform to avoid operational issues.

In summary, Dutch telecom-grade QSFP28 modules are available from €35 for short-reach third-party options to several thousand euros for OEM long-reach modules, wi...
