

Error retrieving ST interface

Overview

Before connecting the Nucleo-144 board to a Windows 7, Windows 8 or Windows 10 PC via USB, a driver for ST-LINK/V2-1 must be installed. It can be downloaded from the www.st.com. In setting, I set "Connect under reset" and SWD interface (I'm not sure about frequency). Anyway, if you need to use SWD. Check if the ST-LINK/V2 is viable directly under STM32 Cube Programmer. PayPal Venmo Up vote any posts that you find helpful, it shows what's working. Disclaimer: ST Community is moving to a new platform. Your account and historical community data will be transferred. 2022-04-16 3:17 PM I have a new Nucleo F401RE board that I. On STM32CubeProgrammer trying to connect to ST-Link module on STM32H7B3LI, I get this: I already tried installing the firmware here but it doesn't help: <https://www.st.com/en/development-tools/stsw-link007>. The IDE that I am using is Atollic TrueStudio 5. Now I am facing a very weird problem which is I keep on getting the message Error in initializing ST-Link Device. An error appears in the ST-LINK utility.
