

Fiber optic cable caught in door

Overview

Begin by examining all visible fiber optic cables. Look for sharp bends, kinks, or signs of crushing. Cables should maintain a minimum bend radius—typically 10 times the cable's outer diameter—to prevent signal loss. If you see any physical damage, replace the cable. I just had a knock at the door from a young guy in a suit around the same age as me (23) asking to come in to check my fibre optic. As I do not handle the internet or anything I was stumped and slightly entertaining this. He had a clipboard and then he mentioned a company and I noticed it wasn't my.
