

Fireproof partition wrapping for cable trays

Overview

Flexible and tear-resistant fire protection wraps and bandages with an intumescent coating are used to seal pipes and cables. In case of fire, a solid foam body forms around the cable system or structural opening so that it is permanently sealed against the passage of fire and smoke. Effective protection of cable systems around the world: our tried-and-tested FLAMMOTECT-A and DG-CR 0. The FyreWrap system ensures electrical circuit integrity during exposure to an external hydrocarbon fire permitting continued operation or. FireMaster Cable Wrap is a flexible blanket composed of high temperature fibers classified for applications to 1200°C (2192°F). The core fibers inside this FireMaster Cable Tray Wrap are made sing Morgan Advanced Materials patented Superwool®, low biopersistent manufacturing technology. FireMaster® products insulate cable trays carrying instrument control cables to ensure that the cables can operate long enough to allow process shut down during fires.
