

Flexible optical cable 10

Overview

The 10G SFP+ Active Optical Cable (10M) provides high-speed, low-latency data transmission for data centers and enterprise networks. It combines transceivers and fiber in a single lightweight assembly for superior performance. Ideal for short-range, high-density interconnect. The ExaMAX® I/O system offers cable assemblies and I/O connector solutions for both internal and external applications. Product Application The flexible non-metallic armored (butterfly) optical. The ever-increasing use of fiber optics, particularly in advanced systems such as C4ISR (Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance) calls for high density, robust, multipurpose cable assemblies that helps allow the design engineer the flexibility to. Working with the FLEXOPTIX Transceivers and FLEXBOX is not only uncomplicated but offers us the possibility of working with many vendor types to support the different campus networks. In Optral we manufacture cables with the best optical fibers in the market. Sensing & Monitoring Solutions based in Optical Fibre We have product quality certificates UL. Global Recycled Standard (GRS) certified products contain recycled content that has been independently verified at each stage of the supply chain, from the source to the final product and meet social, environmental, and chemical requirements. The purchase of Global Recycled Standard (GRS) certified.
