

Green Energy Internet Service Platform

Overview

Major cloud providers like Google and Microsoft are making commitments to sustainability, with goals to operate on renewable energy and reduce carbon emissions. AWS targets 100% renewable. The Green Web Foundation is an independent non-profit that tracks how much of the internet runs on green energy. Manage the environmental impact of your digital products. Apply best practices in digital sustainability. I was the go between my. PUE, or Power Usage Effectiveness, measures the ratio of total energy used by a data centre to the energy delivered to computing equipment—the closer to 1, the more efficient the facility. Our flagship UK datacentre, for example, has a PUE of 1. Discover who is leading the way in sustainable cloud technology, learn about the role of renewables, and see what the future might hold for. Founded in 2003, Green ISP is a not-for-profit, forward thinking, innovative Internet Services Provider (ISP), which aims to secure its vision of being securely placed to meet the understanding and requirements of our fast changing world, society and environment. We've partnered with renewable energy suppliers and cloud partners to ensure that our each of the 1 million+ websites on our platform is powered by 100% renewable energy.
