

H3c optical line terminal

Overview

The S7500X-G series PON product is a new generation of high-end multi-service access OLT device launched by New H3C Technologies Co. It supports simultaneous access to both GPON and XGSPON. for converged service networks, and it is also a distributed high-end routing switch. It is a combination of the Ethernet technology and the PON technology in compliance with the IEEE 802. 3ah standards issued in June, 2004. A typical EPON system. Explore our range of high-quality GPON, EPON, and XG (S)PON OLT products. Find the perfect Optical Line Terminal solutions for your network needs. It provides two main functions: to perform conversion between the electrical signals used by the service provider's equipment and the. Page 3 Preface This installation guides you through installation of your S7500X-G switch, including preparing for installation, installing the device, installing FRUs, connecting the device to the network, troubleshooting, and replacement procedures. This preface includes the following topics about.
