

How much does a flame-retardant fiber optic patch cord cost

AI Overview

Flame-retardant fiber optic patch cords typically range from \$10 to \$50 per meter, depending on fiber type, connector, and jacket specifications.

Pricing Overview

The cost of flame-retardant fiber optic patch cords depends on several factors:

- Fiber Type:** Single-mode (OS1/OS2) cables are generally more expensive than multimode (OM1-OM5) due to higher performance requirements.
- Connector Type:** LC, SC, ST, and MTP connectors influence price, with MPO/MTP connectors for multi-fiber applications costing more due to precise alignment and polishing requirements.
- Jacket Material:** Flame-retardant jackets such as FRNC (Flame Retardant Non-Corrosive) or LSZH (Low Smoke Zero Halogen) add to the cost. Armored or double-armored designs for industrial or harsh environments further increase the price.
- Length:** Prices are typically calculated per meter, with longer cables incurring a linear increase in cost.

Typical Price Ranges

- Standard Flame-Retardant Patch Cords:** \$10-\$25 per meter for short lengths (1-5 meters) with LC or SC connectors and LSZH jackets.
- Armored or Industrial-Grade Fire-Resistant Cords:** \$30-\$50 per meter, offering dual-layer protection, armored construction, and compliance with IEC 60332-3 fire-resistance standards.
- Custom or Pre-Terminated Options:** Prices may vary based on connector type, fiber count, and additional specifications such as low insertion loss (50 dB).

Applications

- Flame-retardant fiber optic patch cords are suitable for:**
- Data Centers and Office Buildings:** Ensuring safe, high-speed connectivity in public spaces.
- Industrial Environments:** Providing mechanical strength and fire resistance in harsh conditions.
- Emergency Systems:** Maintaining reliable communication during critical situations.

Summary

When budgeting for flame-retardant fiber optic patch cords, expect \$10-\$50 per meter, with higher costs for a...
