

How much does an MS9740A spectrometer cost

AI Overview

The Anritsu MS9740A Spectrum Analyzer is typically available as a used or refurbished unit, with prices ranging from approximately \$10,000 to \$25,000 depending on condition and included options.

Pricing Overview

eBay Listings: Used MS9740A units are available, often as floor models or store returns, with prices generally starting around \$10,000. Financing options may be available through services like Klarna, allowing payments over 3 to 24 months with interest rates from 0% to 35.99% depending on eligibility and terms.

AssetRelay: Offers the MS9740A with GPIB options for purchase, calibration, and repair. Prices are not explicitly listed, but units are typically sold as refurbished or pre-owned, which can place them in the \$15,000–\$25,000 range depending on configuration and included options.

Alibaba and Other Suppliers: Some international suppliers list the MS9740A for sale, often providing both new and used units. Pricing varies widely based on shipping, import fees, and condition, but used units generally align with the eBay and AssetRelay range.

Factors Affecting Price

Condition: New units are rare and expensive, while used or refurbished units are more common and significantly cheaper. Cosmetic wear may be present on used units but typically does not affect functionality.

Options and Accessories: Units with additional options like GPIB interface, internal calibration sources, or specialized fiber adapters may cost more.

Seller and Location: Prices can vary depending on the seller's location, shipping costs, and whether the unit is sold with warranty or technical support.

Summary

For most buyers, the MS9740A Spectrum Analyzer is accessible in the \$10,000–\$25,000 range for used or refurbished units. Prospective buyers should consider the unit's condition, included options, and potential financing when evaluating purchase options.
