

How to connect a 120mm cable tray

AI Overview

Running a 120mm cable through a cable tray requires careful planning, proper tray selection, adherence to bending radius, and secure support to ensure safety and compliance. Select the Appropriate Cable Tray For a large 120mm cable, ladder trays or ventilated trough trays are recommended. Ladder trays provide excellent ventilation and convenient anchor points for securing heavy cables, while ventilated troughs offer continuous support to prevent sagging. Ensure the tray width and depth can accommodate the cable without exceeding 40% of tray fill capacity to avoid overheating and mechanical stress. Maintain Proper Bending Radius Large cables like 120mm require a minimum bend radius to prevent insulation damage. Typically, the bend radius should be at least 10 times the cable diameter, so for a 120mm cable, a radius of 1.2 meters is recommended. Avoid sharp bends, especially at tray transitions, elbows, or entry/exit points. Support and Securing Cables must be supported at regular intervals along the tray. For heavy cables, use center-hung or side-hung supports with a maximum spacing of 3-3.6 meters, depending on the tray type and load. Secure the cable with cable ties or clamps at each support point to prevent movement and reduce stress during short-circuit events. Installation Procedure Inspect the tray for damage, sharp edges, or obstructions before installation. Plan the cable route, including entry/exit points, bends, and supports. Pull the cable carefully, using rollers or a cable puller for long runs to reduce friction and prevent insulation damage. Fix the cable at each support point, ensuring it is not twisted or compressed. Label the cable for identification and future maintenance. Compliance and Safety Ensure the installation complies with local electrical codes (e.g., NEC Article 392 in the U.S.) and manufacturer specifications for both the cable and tray. Avoid overloading the tray, maintain proper spacing, and consider environmental factors such as moisture or corrosive conditions, which may...
