

How to fix the optical distribution box to the utility pole

AI Overview

To fix an optical distribution box to a utility pole, use a pole-mount bracket, stainless steel bands, and proper cable management to securely attach the box while maintaining fiber slack and safety clearances.

Required Tools and Materials

- Pole mount bracket (e.g., YK-SX or equivalent)
- Slack storage bracket for fiber optic cable
- Stainless steel bands and buckles
- Ratchet-strapping or banding tool
- Nylon ties
- Hammer and screws
- ADSS or mini ADSS fiber optic cable and drop cables
- Optical distribution box (PBO or FOAB type)

Step-by-Step Installation

- Prepare the Pole and Bracket**
 - Inspect the utility pole to ensure it can support the weight and tension of the optical box and cables.
 - Attach the slack storage bracket to the pole and adjust screws to secure it in place.
- Secure the Bracket with Stainless Steel Bands**
 - Insert stainless steel bands through the bracket slots.
 - Tighten the bands using buckles and a ratchet-strapping tool to firmly attach the bracket to the pole.
- Mount the Optical Distribution Box**
 - Place the optical distribution box onto the pole mount bracket.
 - Ensure the box is level and accessible for future maintenance.
 - Use additional holes for nylon ties to further secure the box if needed.
- Manage Fiber Slack**
 - Coil the fiber optic cable and insert it into the slack storage compartment.
 - Maintain enough slack for future splicing, repairs, or additional connections.
- Connect Drop Cables**
 - Splice or terminate the customer drop cables inside the distribution box using splice trays or pre-terminated connectors.
 - Route fibers neatly and secure with cable ties or Velcro straps to prevent tangling.
- Maintain Safety and Clearance**
 - Ensure the optical cable occupies the uppermost communication space on the pole.
 - Maintain proper clearance from power lines and other utilities according to the National Electrical Safety Code.
 - Evaluate the need for temporary supports if the pole or cable is under unbalanced load.
