

Huawei S572028XSI24SAC Optical Port Switch

Overview

Huawei S5720-28X-SI-24S-AC switch with 16*100/1000BASE-X ports, 8* combo ports (10/100/1000BASE-T + 100/1000BASE-X), 4* 10GE SFP+ ports, 1x AC power input fixed. S5720-SI Flexible Gigabit Ethernet switches that provide resilient, high-density Layer 3 switching for data. Table 4-424 lists the mapping between the S5720-28X-SI-24S-AC chassis and software versions. If a port uses a GPON optical module, other 10GE SFP+ optical ports cannot be used. It is used with a console cable. Features include. This article summarizes several solutions for using optical modules with switches and common problems encountered during usage, along with specific solutions. Huawei S5720-32P-EI-AC Switch II. Original, new and sealed switch; original. By default, a combo port works in auto mode, in which the port type is determined as follows: You can configure a combo port as an electrical or optical port using the combo-port command.
