

Large-span galvanized fire-resistant cable trays

Overview

Large span cable trays are designed to support heavy cable loads across long distances without intermediate supports. Application: Various types of buildings; Material: Galvanized cable tray; Max. Working Load: None; Side Rail Height: None; Type: Tray cable ladder; Model Number: 50*50, 100*50, 100*100, 150*100, 200*100, 300*100; Place of Origin: Xinghua City, Taizhou, Jiangsu Province; Surface Finishing: powder-coated, hot-dip. Strong and durable large span cable trays designed for heavy-duty industrial and commercial electrical systems. The tray first undergoes a galvanizing process, which forms a dense zinc coating on its surface to significantly enhance corrosion resistance. On top of this galvanized layer, a fire-resistant spray-paint. Composite Material Use: Growth in fire-rated PVC and fiberglass (FRP) trays for corrosion resistance. Demand distribution shows clear geographic patterns linked to industrialization and regulatory. Fire-resistant cable tray, also referred to as flame-retardant cable tray, is a type of cable management system designed to maintain circuit integrity and ensure continuous operation of the cables within it for a specified duration under high-temperature conditions.
