

# Mexican Lighting Distribution Box Model List

## AI Overview

Lighting distribution boxes in Mexico are categorized by type, material, certification, and application, with model indications often reflecting these specifications. Overview of Lighting Distribution Boxes in Mexico Lighting distribution boxes are essential for safely distributing electrical power to lighting systems in residential, commercial, and industrial settings. In Mexico, the market is growing due to modernization of electrical systems, energy efficiency mandates, and increasing adoption of smart lighting solutions. Distribution boxes are typically designed to comply with NOM-031 and other local electrical safety standards, ensuring safe operation under Mexican regulatory requirements. Model Indications and Classification Model indications for Mexican lighting distribution boxes generally reflect the following attributes: Type of Box: Standard, local control station, or hazardous area (Ex-rated) distribution boxes. Material: Common materials include stainless steel (AISI 304L or 316L), polyester (GRP), or other corrosion-resistant materials suitable for indoor or outdoor use. Certification: Models may indicate compliance with ATEX, IECEx, UL, or NOM certifications, especially for explosion-proof or hazardous area applications. Configuration: Number of circuits, internal layout, and mounting options are often part of the model code. Some manufacturers allow customizable internal structures with multiple control elements, push buttons, or LED indicators. Application: Indoor, outdoor, industrial, or commercial use; some models are designed for retrofit installations in existing lighting systems. For example, a model code might include letters or numbers indicating the series (e.g., DVT, Terbox, Contrex), material, number of control elements, and certification type. Leading Manufacturers in Mexico Several companies provide lighting distribution boxes with clear model indic...
