

Model of multimode 8-core outdoor optical cable

AI Overview

Popular 8-core multimode outdoor optical cables include HES OM4 Steel Armored, TMT Global OM4 Armored, and Excel Enbeam OM4/OM5 Loose Tube designs.

HES OM4 8-Core Steel Armored Cable The HES 8-core OM4 multimode fiber optic cable features a 50/125 μ m core diameter, providing high bandwidth, low insertion loss, and long-distance transmission. It comes in a single-tube steel-armored design with a single jacket, offering robust protection against environmental factors. The cable is flame retardant, RoHS compliant, and suitable for data centers, industrial networks, and high-capacity outdoor applications. Lengths can be customized with a $\pm 5\%$ tolerance, and it supports reliable high-speed data transfer.

TMT Global 8-Core OM4 Armored Cable The TMT Global 8-core OM4 multimode armored cable is designed for industrial, indoor, and outdoor applications. It provides high-strength construction suitable for harsh environments, including CCTV, SMATV, and audio-video intercom systems. The cable meets ISO/IEC and ANSI/TIA standards, ensuring compatibility with high-speed, long-distance fiber networks. Its armored design enhances durability and rodent resistance, making it ideal for direct burial or exposed outdoor installations.

Excel Enbeam OM4/OM5 8-Core Loose Tube Cable The Excel Enbeam OM4 and OM5 8-core multimode cables use a loose tube construction with 50/125 μ m fibers. These cables are bend-insensitive, rodent-resistant, and suitable for internal and external applications. OM5 models support 40, 100, and 400 Gigabit Ethernet over distances of 440m, 350m, and 150m respectively. The cables feature LS0H or B2ca flame-retardant sheaths, Euroclass fire ratings, and sequential meter markings for easy installation and traceability. They are suitable for high-performance outdoor networks requiring flexibility and mechanical protection.
