

Modular Circuit Breaker Distribution Box

Overview

Our Modular Distribution Boxes are engineered to provide a robust, scalable, and perfectly organized enclosure for all your MCBs, RCCBs, and RCBOs. Featuring a modular interior design, these boxes allow for effortless component arrangement, future expansions, and streamlined. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices. GM Distribution Board (DBs) blend aesthetics, functionality, and safety. They are made with high precision and top-quality metal sheets, ensuring anti-rust conditioning and durability. We have power distribution board types at the best price online. Our well-established System pro M compact® portfolio offers highest levels of safety, as well as smart solutions that take energy efficiency to the next level. To further enhance reliability and field-connectivity. A modular mcb box represents a sophisticated electrical distribution system designed to house and organize miniature circuit breakers in a systematic, expandable format.
