AI Overview

Nauru Intelligent Distribution Boxes are designed to meet national standards for safety, energy efficiency, and smart control, integrating low-voltage distribution, protection, and automation features. Overview Nauru Intelligent Distribution Boxes, also referred to as PDUs (Power Distribution Units), are manufactured in accordance with Nauru standards and are suitable for applications ranging from standard duty to industrial environments, including data centers and server rooms . These units combine traditional electrical protection components such as leakage protectors, air switches, and AC contactors with intelligent controllers like the KC868-H8, enabling remote control, energy management, and automated operation .

Key Features

Safety and Protection: Equipped with leakage protection, air switches, and manual override for AC contactors to ensure safe operation even during network or electrical faults .

Smart Control: Supports connection to various sensors (wind, rain, smoke, human infrared, door lock, leakage, power loss, light) to monitor real-time conditions and trigger alarms or automated responses via mobile apps .

Energy Efficiency: Timing modes and load management allow for optimized energy consumption across a building, floor, or entire facility .

Integration: Can be customized for reactive power compensation, energy metering, and low-voltage AC 50Hz distribution systems, complying with standards such as GB7251.12-2013 and GB/T15576-2008 .

Construction and Durability: Cabinets are fabricated from high-quality steel or aluminum alloy with anti-corrosion treatment, insulation, and high structural strength, suitable for harsh environments .

Applications

Industrial and Commercial: Factories, enterprises, and data centers requiring automated load control and energy monitoring .

Residential and Smart Homes: Villas, apartments, and schools for anti-t...
