

New Energy for Swiss Communication Sites

Overview

The new, future-proof Energy & Enclosure platform is a fully integrated site-energy solution that combines high-efficiency power systems, intelligent energy storage, advanced enclosures, and the Controller 6610 to deliver more resilient, secure, and sustainable networks. Where is electricity produced in Switzerland?

Which energy projects have been awarded?

The winners for 2026 are. By the end of 2025, the fibre-optic network will cover 57% of the population, with coverage set to increase to between 75% and 80% by the end of 2030. The researchers developed three strategies for expanding renewable energies. The. The Energy Act, the CO2 Act, the Climate and Innovation Act and the Electricity Supply Act all build on this article and together form the body of legislation on which Switzerland's sustainable and modern energy policy is based. Swissgrid has identified 31 grid projects which must be implemented by the target year 2040 and which, along with the existing grid, will then form the «grid of the future». It must continue to be developed so.
