

Portugal Fireproof Cable Tray Price Quote

AI Overview

Fireproof cable trays in Portugal typically cost between €50 and €200 per meter, depending on material, type, and fire rating.

Cost Factors

- Material:** Stainless steel and galvanized steel trays are more expensive than aluminum or powder-coated options due to higher fire and corrosion resistance.
- Type of Tray:** Ladder, perforated, and enclosed trays vary in price. Enclosed or fully protected trays designed for high fire resistance are at the higher end of the range.
- Fire Rating:** Trays certified to standards like UL 1724 or NFPA 70 may cost more due to testing and compliance requirements.
- Size and Configuration:** Wider trays or those with additional supports, rungs, or custom dimensions increase material and labor costs.
- Accessories and Coatings:** Intumescent coatings, fire blankets, or mineral-insulated wraps add to the overall cost.

Typical Price Range

- Basic fireproof perforated or ladder trays: €50–€100 per meter
- High-end stainless steel or fully enclosed trays: €150–€200 per meter
- Custom or specialized installations (e.g., server rooms, chemical plants): Prices may exceed €200 per meter due to additional fireproofing and installation requirements.

Additional Considerations

- Installation Costs:** Labor and mounting hardware can add 20–40% to the material cost.
- Supplier Options:** Companies like GroupSumi, Brilltech Engineers, and other Portuguese suppliers offer a range of fireproof cable trays with fast delivery and technical support.
- Maintenance and Longevity:** Fireproof trays are durable and require minimal maintenance, which can offset higher upfront costs.

For precise pricing, it is recommended to contact local suppliers with your project specifications, including tray length, material, and fire rating requirements, to obtain accurate quotes.
