

Price List for Wiring in Distribution Boxes

AI Overview

The total cost for wiring and installing a distribution box typically ranges from \$350 to \$2,000, depending on panel size, amperage, labor, and permits.

Cost Breakdown

Materials: The price of the distribution box itself varies by amperage and enclosure type. Standard 100-125A panels with basic wiring and a few breakers usually cost \$100-\$350, while 200A panels or outdoor weatherproof enclosures can range from \$500-\$800 depending on durability and features. Plastic enclosures or retrofit kits may reduce upfront costs but can affect long-term durability.

Labor: Electrician labor is a significant portion of the total cost. Typical hourly rates range from \$75-\$150, with total labor for a standard 100-125A replacement taking 4-8 hours, and more complex 200A upgrades requiring 12-18 hours. Labor costs vary by region, accessibility, and complexity of wiring runs.

Permits and Fees: Permits are often required and can add \$50-\$300 for standard residential projects, with higher fees in dense metropolitan areas. Additional costs may include waste disposal, inspection fees, or temporary power shut-offs.

Typical Price Ranges

- Basic Replacement (100-125A, indoor, standard wiring):** \$450-\$900 including materials, labor, and permits.
- Mid-Range Upgrade (150-200A, outdoor, some rewiring):** \$1,200-\$2,000, depending on panel type and labor complexity.
- Premium/Full Upgrade (200A, outdoor, complex routing, smart meters, surge protection):** \$2,800-\$4,500 or higher, especially in high-cost urban areas.

Factors Affecting Cost

- Panel Amperage:** Higher amperage panels require more robust wiring and breakers, increasing material and labor costs.
- Location:** Outdoor or hard-to-access panels increase installation difficulty and cost.
- Wiring Length and Complexity:** Longer runs or rerouting existing wiring adds labor hours.
- Permits and Code Compliance:** Local regulations can affect total cost, especially in metropolitan areas.
- Additional Features:** Weatherproofing, surge protection, or smart monitoring systems increase material costs.
