

Price of 3x3 Distribution Box

AI Overview

The price of a 3x3 distribution box typically ranges from \$5 to \$50 per unit, depending on material, features, and order volume. Price Range and Factors The cost of a 3x3 distribution box varies widely based on material, type, and supplier. Basic PVC or plastic 3x3 boxes for residential use generally start around \$5-\$15 per unit, while metal or fiberglass boxes with enhanced durability, waterproofing, or smart features can range from \$20-\$50 or more. Wholesale orders or bulk purchases often reduce the per-unit cost, especially for distributors or large projects. Material and Feature Considerations PVC/Plastic Boxes: Lightweight, corrosion-resistant, suitable for indoor or light-duty applications. Prices are lower and widely available. Metal Boxes: More durable, suitable for industrial or outdoor use, often with higher IP ratings for water and dust protection. Fiberglass Boxes: High durability and weather resistance, ideal for harsh environments, typically at the higher end of the price spectrum. Smart or Advanced Boxes: Include features like remote monitoring, overload protection, and surge protection, which can increase cost but improve safety and efficiency. Purchasing Tips Wholesale vs Retail: Buying in bulk reduces per-unit cost. Alibaba and Made-in-China platforms offer both options. Customization: Some suppliers provide OEM options, modular designs, or IP-rated enclosures, which may affect pricing. Outdoor Use: Ensure waterproof or weather-resistant models if installing outdoors, as these are slightly more expensive but essential for safety. In summary, a standard 3x3 distribution box costs between \$5 and \$50, with the final price influenced by material, protective features, and order quantity. For precise pricing, contacting suppliers directly for quotes based on specifications is recommended.
