

Prices of Level 1 2 and 3 Distribution Boxes

AI Overview

Distribution box prices vary widely depending on level, specifications, and customization, typically ranging from \$50 for basic units to several thousand dollars for advanced industrial models.

Typical Price Ranges

Level 1 Distribution Boxes: These are basic enclosures for small-scale or residential applications. Prices generally range from \$50 to \$200 per unit, depending on material, amperage, and number of circuits.

Level 2 Distribution Boxes: Designed for medium-scale commercial or light industrial use, these boxes often include additional safety features, higher capacity, and modular designs. Prices typically range from \$200 to \$800 per unit.

Level 3 Distribution Boxes: These are high-capacity, industrial-grade units with advanced features such as three-phase power handling, smart monitoring, and weatherproof enclosures. Prices can range from \$800 to \$3,000 or more per unit, depending on customization, IP rating, and integrated control systems.

Factors Affecting Price

Material and Construction: Stainless steel or polycarbonate enclosures are more expensive than standard sheet metal.

Capacity and Voltage Rating: Higher amperage and three-phase systems increase cost.

Customization: OEM/ODM options, busbar modifications, and branding can significantly affect pricing.

Installation and Maintenance: Some suppliers include installation or offer pre-wired units, which adds to the total cost.

Environmental Rating: Outdoor or IP66/IP67-rated boxes are priced higher due to weatherproofing and durability.

How to Obtain Exact Pricing

For precise quotes, it is recommended to contact manufacturers or distributors directly, providing specifications such as voltage, number of circuits, material, and any custom features. Platforms like Made-in-China, Global Sources, and Alibaba offer factory-direct pricing and bulk order discounts. Wholesale orders often reduce per-unit costs, especially f...
