

Router cables and fiber optic cables are expensive

Overview

The main cost drivers are cable grade (indoor vs outdoor, riser vs plenum), fiber type (single-mode vs multimode), connectorization, and installation length. This guide presents cost ranges in USD and highlights how price can vary by region and project scope. This guide compares fiber-optic cable and traditional copper internet cable (coaxial cable) across key factors: technology, speed, reliability, and cost in 2025. A fiber optic cable. These fibers are thin strands, often as small as a human hair, that transmit data as pulses of light. With prices ranging from \$1 to over \$ 50 per linear foot, depending on the installation method, understanding these costs helps make informed decisions about this essential connectivity investment. Whether you're planning a national fiber rollout or sourcing cables for enterprise infrastructure, understanding how fiber optic cable pricing works can help you budget more effectively and make better. Currently, two major broadband technologies dominate the market: traditional cable and lightning-fast fiber-optic networks.
