

STFC Interface Optical Power Meter

Overview

With this power meter it is very easy to measure the signal strength on optical fiber which allows to quickly find over modulations and defective cables. The following wavelengths settings are available: 850nm, 1300nm, 1490nm, 1550nm and 1625nm. The device is very handy and as it works with battery. SMARTFiber is a four wavelength (850nm, 1300nm, 1310nm, 1550nm) Fiber Optic Power Meter used for measuring the optical power from fiber optic cabling systems. It includes interchangeable connectors for testing FC, ST, SC type interface, and 2. It utilizes InGaAs photodiode for greater. [STANDARD INTERFACE] The optical power meter features a 2. [INTELLIGENT CHIP] Equipped with a powerful integrated chip, this meter ensures a stable and strong light emission for. 4-in-1 optical power meter features a color display and offers multiple functions, including optical power measurement, continuity testing, red light detection, and quality control. Compatible with FC, SC, and ST. UK Specialists in Fibre Optic Test Equipment & Structured Cabling — Aligned with BS EN Compliant Solutions for Data Centres & ICT Installers Taxes included.
