

Single-mode single-fiber transceiver SC interface

Overview

It is suitable for single-mode fiber (SMF) communications in 1. 25Gbps Ethernet and 1G/2G Fiber Channel. The 1000BASE-SX SFP, compatible with the IEEE 802. The SFP transceivers are high-quality and cost-effective modules that support transmission speeds of up to 1. All modules meet. WAVELENGTH: The one pair SC WDM transceivers with TX1310nm/RX1550nm (blue color) and TX1550nm/RX1310nm (yellow color). PLUG and PLAY: Support Hot-swappable and DDM function to monitor real-time parameter and state on fiber links. WIDE COMPATIBILITY: Widely used. Most SFP fiber optic modules use LC connectors, while SC connectors are mainly found in legacy networks and MPO/MTP connectors are used for high-density cabling rather than directly on standard SFP modules. This connector landscape reflects how modern SFP deployments prioritize port density and. For the purposes of this documentation set, bias-free is defined as language that does not imply discrimination based on age, disability, gender, racial identity, ethnic identity, sexual orientation, socioeconomic status, and intersectionality.
