

Suspended distribution box models

AI Overview

Suspended distribution boxes are available in various materials, sizes, and configurations for industrial, construction, and aerial platform applications, offering flexible suspension and safety features.

Types and Materials Suspended distribution boxes come in solid rubber, plastic, and steel housings, designed for durability and outdoor use. For example, K2 offers solid rubber housing boxes with press and vulcanization production, providing mechanical protection, short-circuit safety, and long service life, suitable for wall-mounted or suspended setups. Plastic versions, like the PCE Freistadt model, are compact (129x129x100 mm), include eye screws for suspension, and are rated for 16A current, ready for industrial or construction use.

Configurations and Features

Output Sockets: Models can include multiple sockets with earthing contact, CEE 16A/32A/63A connectors, and automatic circuit breakers for protection.

Suspension Methods: Options include internal or external suspension, hook handles, eye screws, and flexible mounting for space-saving installation.

Control Boxes for Suspended Platforms: Specialized models for ZLP series or aerial work platforms feature overload protection, emergency stop, phase loss protection, limit switch compatibility, and intuitive operation buttons for high-altitude safety.

Applications Suspended distribution boxes are used in: Construction and industrial sites for power distribution and equipment connection. Aerial work platforms and suspended access platforms for curtain wall construction, window cleaning, painting, and installation projects. Outdoor energy islands or decentralized power distribution setups, with options for modular or pluggable connections for flexible installation.

Accessories and Safety Mounting brackets (V2A stainless steel) and transparent hinged windows for monitoring. No-rust screws and protective measures for safeguarding people, devices, and cables. RCDs and fuses integrated for short-circuit and residual current protection.
