

There is an electrical distribution box in the hallway of the house

Focus creates quality products

Overview

MCBs (Miniature Circuit Breakers) are typically located in the main electrical distribution board of a house. This board is usually placed in a utility area, garage, or hallway, where it's easily accessible for maintenance and safety checks. Electrical panel boxes, aka breaker boxes, can be on a wall in an out-of-the-way area of your home. Despite this, it often ekes out an inconspicuous existence in the basement or utility room until something stops working properly or an extension becomes. Here's a quick look at the functions of that grey metal box, called a circuit breaker panel in the electric biz. It's fed by heavy insulated aluminum wiring that runs from the utility. Every home should have a HOUSE FUSE BOX located somewhere in the property. This box always has the same purpose regardless of the name you know it by and its.
