

What router should I use for dual fiber optic connections with China Telecom

AI Overview

Yes, dual fiber optic routers such as the TP-Link WTA301 telecom edition and XGSPON AX3000 routers are compatible with China Telecom broadband. TP-Link WTA301 Telecom Edition The TP-Link WTA301 telecom edition is specifically optimized for China Telecom users. It supports Wi-Fi 6 (802.11ax) with dual-band concurrent speeds up to 3000 Mbps (2400 Mbps on 5 GHz + 600 Mbps on 2.4 GHz) and full gigabit LAN ports. The router comes with telecom-specific firmware, which improves PPPoE dial-up success rates to 99.7%, reducing disconnections compared to standard versions. It is compatible with optical modems from major manufacturers like Huawei, ZTE, and FiberHome, making it suitable for multi-device households and high-demand applications such as gaming and streaming. The router does not have a built-in fiber interface, so it must be paired with a matching optical modem. Dual-Band Wi-Fi 6 XGSPON AX3000 Routers Another option is the Dual-Band Wi-Fi 6 XGSPON AX3000 ONU/ONT router, which integrates XGSPON technology to support 10 Gbps downstream speeds. It features dual-band Wi-Fi 6, multiple Ethernet ports (12.5G and 3 Gigabit), VOIP, and USB interfaces. This router is designed for FTTH (Fiber To The Home) deployments and provides stable, high-speed internet for both homes and enterprises. It is compatible with China Telecom's fiber optic network and supports seamless connectivity for streaming, gaming, and smart home devices. Key Considerations Ensure the router is the telecom edition or explicitly supports China Telecom to avoid PPPoE or compatibility issues. Pair the router with a compatible optical modem (ONT/ONU), as most dual fiber routers do not have a direct fiber interface. For large apartments or multi-device households, routers with Wi-Fi 6 and MU-MIMO/OFDMA support are recommended to maintain stable connections. Compa...
