

What types of outdoor server racks are available in Africa

AI Overview

IP55-IP66 rated, corrosion-resistant outdoor server cabinets with active cooling and local support are ideal for African deployments. Key Considerations for Africa:

- Climate and Environmental Protection:** African outdoor environments often involve high temperatures, intense UV exposure, heavy rainfall, dust, and coastal salt spray. Outdoor server racks should have a minimum IP55 rating to block dust and low-pressure water jets, with IP66 preferred for coastal or flood-prone areas for maximum protection against water ingress and dust.
- Material and Corrosion Resistance:** Cabinets made from stainless steel, marine-grade aluminum, or Aluzinc provide superior rust resistance compared to standard galvanized steel, which is critical for coastal or industrial sites. Powder-coated finishes enhance UV resistance and longevity.
- Cooling and Thermal Management:** Passive cooling (vented panels and heat sinks) is sufficient for moderate loads (
