

Which cables of a fiber optic router can be unplugged

Overview

Fiber optic connectors used in residential settings are not universal like the plastic RJ45 plugs used for Ethernet cables, and identifying the type is necessary before removal can begin. The two most common types encountered in homes are the SC (Subscriber Connector) and the. Is it safe to unplug the main power from the router and the box with all the green LEDs and after I clean up and organize the wiring just plug them back in?

Or is there a specific power down and power up sequence I should follow?

It really doesn't matter. But if you want things to come back as fast. Yes, you can unplug your fiber optic cable, but it's crucial to do so with extreme care to avoid damage, contamination, and service interruption. Fiber optic cables transmit data. The little screw you circled can be unscrewed at which point the black door that keeps the fiber cable in place can be rotated back (it's hinged) and you can unplug the fiber cable (which snaps into and out of place). Ensure that you have the following parts and tools available: The.
